### Date of birth

1996-12-11

## Software

C/C++

Java

Python

Matlab

Stata

## Short summary

I'm a first year student of the Msc in Data Science and Business Analytics in Bocconi University, after recently graduating from Math in the University of Milan. In academics I have never aspired to nothing under the **excellence**, graduating always with maximum cum laude. **Numbers and codes** were central in my whole life: since I was a kid I have been extremely susceptible to their charm and their power to explain and govern today's world. I wish one day to be capable of building from my **rigorous quantitative foundations** all the knowledge needed to understand the underlying mechanism of finance and day to day business, being finally able to melt all what's needed for a great profile.

Nevertheless, I'm at ease in interpersonal communication, capable of transmitting my passions and knowledge to widely different audiences. I value a lot personal relationships and outdoors sports, and I have been volunteering in my city's parish since I was a child.

I am striving to do find a **challenging, international, intellectually stimulating**, environment for my first real work experience, where I can really exploit all of my capabilities and grow professionally and, inter alia, personally.

## Experience

2014 - present

### School Tutor

In my career I helped students from first grade till university on different topics (from math, to latin, physics, statistics etc), always aiming at teaching them to exploit their capabilities in the best way possible and working together, approaching differently each personality encountered.

2017-12 - 2018-02

### Professor

*Liceo Giovan Battista Grassi - Saronno (VA)*

Taught maths to two classes of high school (liceo scientifico tradizionale). Through this opportunity, I definitely improved my communicational skills on top of my planning abilities, which were fundamental in a role involving such responsibilities.

2016-10 - 2017-02

### Waiter

*Nero Amaro Caffè - Uboldo (VA)*

Learnt how to deal with different types of people, how to work together in a group under a supervisor. Moreover, this experience allowed me to become a more independent member of the family, both economically and personally speaking.

## Education

2018-09 - present

### Università Commerciale Luigi Bocconi, M.Sc. in Data Science and Business Analytics

Looking to find a way to merge my strong mathematical background with more advance knowledge over economics, big data and day to day business, aiming to achieve a more complete and comprehensive vision over the world's processes. I am following the Data Science Track. Relevant courses are:

- Machine Learning 1/2
- Computer Science and Database Systems
- Optimization

GPA: 29.75/31

2015-09 - 2018-07

### University of Milan, Degree in Applied Mathematics

Recently graduated from mathematics, thanks to this experience I acquired eye on problem solving and a whole new way to face problems.

- final score: 110 cum Laude/110
- selected for the erasmus programme at the "Universidad Complutense de

## Languages

Italian

Native

English

Proficient - 106/120 TOEFL

Spanish

Right now attending a B2 course

Madrid"

- final thesis over "Markov's chain and harmonic functions"
- relevant coursework: "Calcolo delle Probabilità e statistica Matematica 1/2", "Programming 1/2"

GPA: 29.2/30

2018-01 -  
2018-06

### Universidad Complutense de Madrid

Semester studying abroad in Spanish thanks to the Erasmus program.

The experience allowed me to live alone and independently for a long period of the year, making me grow both personally and academically.

Beyond that, with the Erasmus I had the chance to get in touch with a multi-cultural environment, to get to know people from different cultures, with complete different habits and backgrounds.

Relevant courses:

- Mathematical Finance
- Stochastic Process

2010-09 -  
2015-07

### Liceo Scientifico G.b. Grassi

Final score: 100 cum laude/100

Relevant facts:

- Winner Dote Merito scholarship - free trip at Beijing (2016) with Prof. Gallico Dalia
- Held a brief conference, named "Fisica in cucina", at "Padiglione Italia" - Expo 2015
- Entered the national phase of "Olimpiadi della Matematica" and got the "menzione d'onore"
- Winner of Valerio Filippini's prize (2014) - best team
- Winner of Intercultura's scholarship: free summer programme in Ireland (2013)

## Interests

Swimming - actually training in GestiSport Lainate, 4 times a week

Mountains (alpine ski, hiking, climbing) - passion shared with my brother, reaching peaks every weekend we are able to

Volunteering - helping in many different initiatives organised in my town, last year summer volunteering trip at Mazabuka, Zambia
