

***If Windows XP Service Pack 2 or later is installed on your PC, you will experience Internet Explorer blocking pop-up windows and file downloads.***

***A)To disable the blocking manually every time you are going to download files from our document server:***

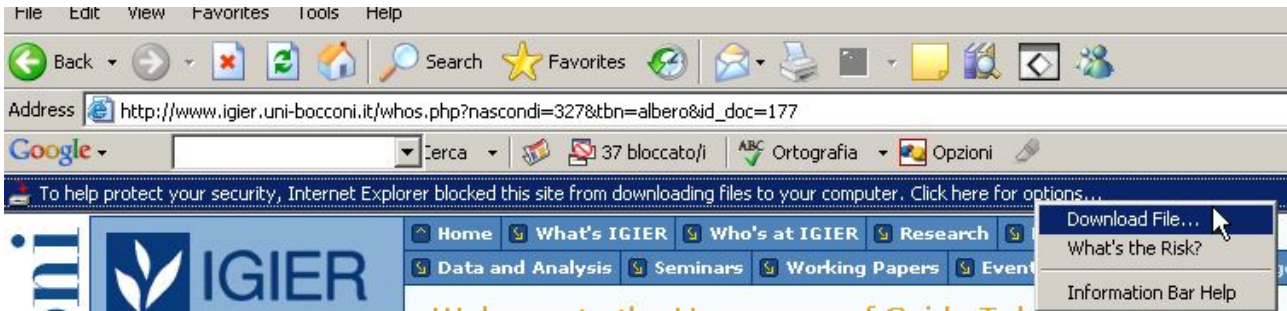

***1. Click OK***

***2. Click "Click here for options..."***

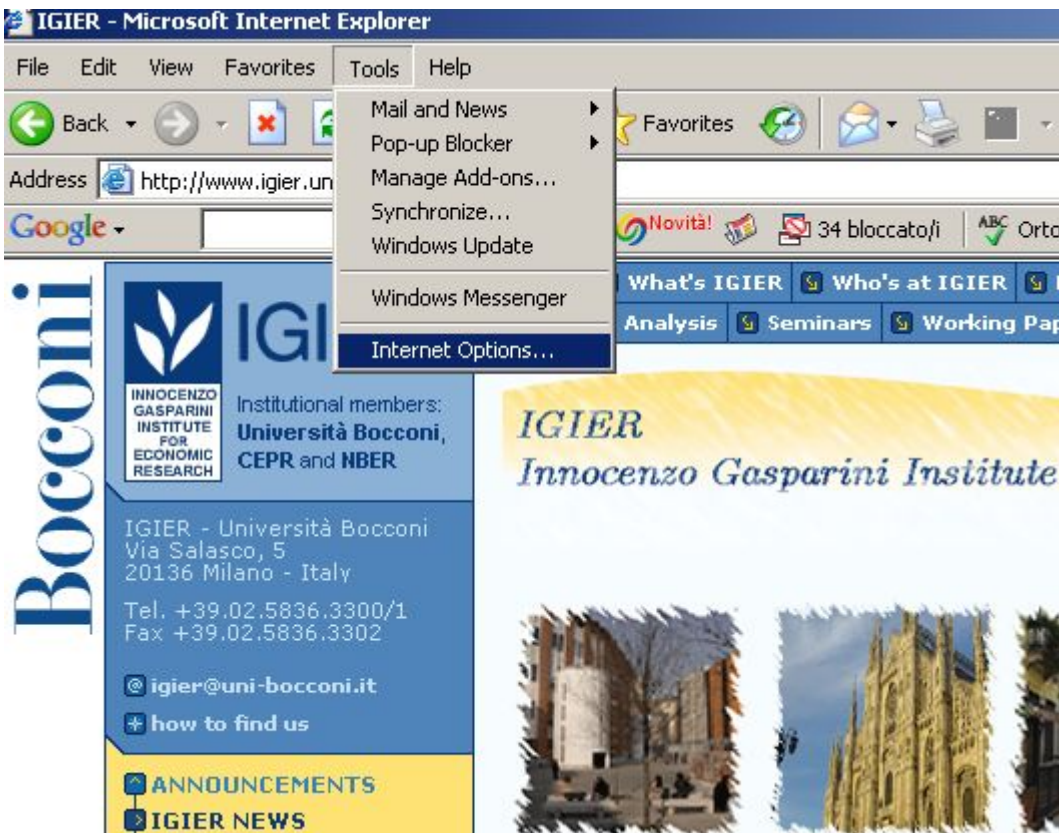

### 3. Click “Download file...”

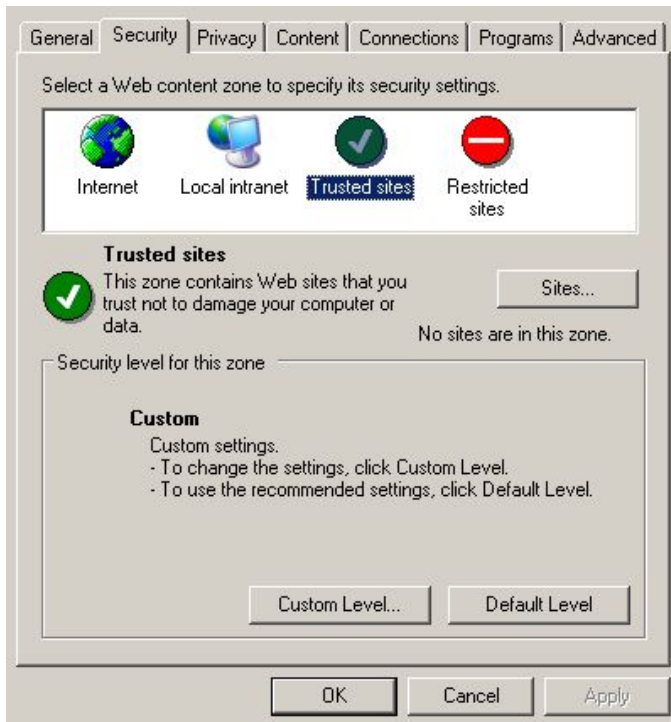

### 4. Click again on the chosen link

**B) If you do not want to have to disable the blocking manually every time you are going to download files from our document server, you may avoid it by going through the following procedure:**

#### 1. In your Internet Explorer go to Tools/Internet Options

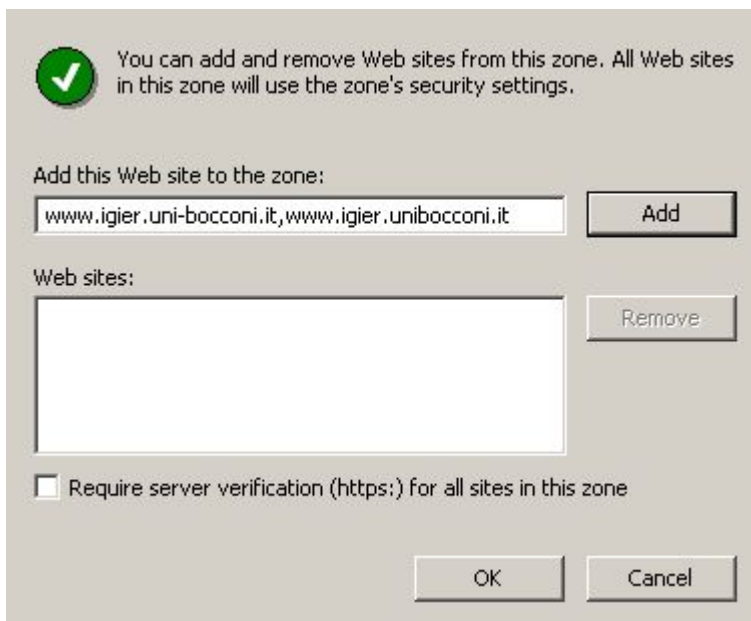

**2. In the appearing dialogue window select tab “Security”**

**3. Select “Trusted sites” and then press the button “Sites...” below**

**4. In the “Trusted sites” dialogue box, first uncheck “Require server verification (https) for all sites in this zone”, then add [www.igier.unibocconi.it](http://www.igier.unibocconi.it) and [www.igier.uni-bocconi.it](http://www.igier.uni-bocconi.it) to the list of trusted sites (as well as any other of your favourite sites where you do not want any protection from pop-ups or cookies).**

**5. OK all and re-launch the browser.**
